Professional Summary

Computer Science undergraduate with hands-on experience in **Full-Stack** web development, data analytics, and applied **AI** systems. Proven track record in building scalable web applications, predictive **ML** pipelines, and data-driven dashboards across high-impact internships and production-grade projects.

Experience

Full Stack Developer Intern – Finz, Physics Wallah (Remote)

May 2026 –Aug 2026

- Developed and maintained reactive web applications using React, JavaScript, CSS, and Firebase authentication services.
- Collaborated with the engineering team to design and build **CRM** systems for internal and client use.
- Reviewed client **ERP** systems and web applications to ensure readiness for commercial deployment.

Data Analytics Intern – Deloitte (Online)

Nov 2025 – Dec 2025

- Performed data cleaning, categorization, and **visualization** to generate actionable business insights.
- Designed **3** interactive Tableau dashboards to visualize telemetry and HR **datasets**.
- Utilized Excel and Deloitte frameworks to derive **data-driven** business recommendations.

Projects

AI Payment & Revenue Recovery System

- Architected an AI recovery engine to intercept failed **transactions** and automate dynamic retries.
- Integrated real-time payment webhooks to detect transaction failures and trigger automated dunning.
- Engineered **predictive** REST APIs workflows to recapture lost revenue and curb subscriber churn.

Customer Churn Prediction System

- Engineered predictive ML pipeline to identify high-risk telecom churn patterns.
- Benchmarked 8 classification models, securing **90.1%** peak accuracy via **XGBoost**.
- Synthesized Kaggle datasets to deliver **real-time** actionable business intelligence.

Conference Management System

- Developed a **full-stack** conference management platform using React, Node.js, Express, and MongoDB.
- Implemented Firebase authentication and role-based access control for secure access.
- Integrated open APIs to extend platform functionality, and used **railway** for rendering.

Skills

Languages: C++, Python, C, Java, JavaScript, PHP

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

AI/ML: Scikit-learn, NumPy, Pandas, Random Forest, LLM Orchestration

Web & Databases: HTML5, CSS3, Tailwind CSS, React.js, Node.js, Express.js, MySQL, MongoDB, Gemini API, REST APIs

Tools & Technologies: GitHub, Git, AWS, Tableau, PyCharm, Eclipse, VS Code

Certifications: Future of AI (BlueDot Impact), Data Analytics (Deloitte), AWS Certified Cloud Practitioner

Education

IILM University, Greater Noida, UP

2023 – 2027

B.Tech in Computer Science and Engineering

CGPA: 7.54

Achievements

- President at E-Cell – Spearheaded** E-Cell Operations, strategic partnerships and startup initiatives.
- Solved more than **300+** DSA problems on platforms like Coding Ninjas, leetcode, Codeforces and Codechef.
- 1st Position at Ideathon – Secured **1st** position for presenting **innovative** eco-friendly alternatives to plastic.
- Team Leader at Hackathon – **Mobilized** and directed a multidisciplinary hackathon team.
- Volunteered at an NGO – Supported **fundraising** initiatives for children with no access to education.
