Professional Summary

I am a Computer Science student with strong foundation in **Full-Stack** web development, data analytics, and AI project development. Experienced in building reactive, scalable applications and delivering data-driven insights through real-world **internships** and **projects**.

Experience

Full Stack Developer Intern – Finz, Physics Wallah (Remote)

May 2026 – Aug 2026

- Developing and maintaining reactive web applications using React, JavaScript, CSS, and Firebase authentication services.
- Collaborating with the team to design and build **CRM** systems for internal and client use.
- Reviewing client **ERP** systems and web applications to ensure readiness for commercial-level deployment.

Data Analytics Intern – Deloitte (Online)

Nov 2025 – Dec 2025

- Performed data cleaning, categorization, and **visualization** to generate actionable business insights.
- Designed **3** interactive Tableau dashboards to visualize telemetry and HR **datasets**.
- Utilized Excel and Deloitte simulation tools to derive **data-driven** business recommendations.

Projects

Customer Churn Prediction System

- Built an **AI**-based churn prediction system to identify telecom customers likely to **churn**.
- Trained and evaluated eight algorithms, including Logistic Regression, Decision Tree, Random Forest, and **XGBoost**, achieving a peak accuracy of **90.1%** with **XGBoost**.
- Used real-world **datasets** from Kaggle to generate real-time insights for business decision-making.

Random Ticket Generator System

- Developed a Random Ticket Generator System in **Java** for automated token generation.
- Applied OOP principles, JDK libraries, Java Enums, and UUID techniques for robust design.
- Implemented lambda expressions, defensive input handling, and a layered architecture.

Conference Management System

- Developed a **MERN**-stack conference management platform using HTML, CSS, JavaScript, and MongoDB.
- Implemented Firebase authentication and role-based access control for secure access.
- Integrated open APIs to extend platform functionality, and used **railway** for rendering.

Skills

Languages: C++, Python, C, Java, JavaScript

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

AI/ML: Scikit-learn, NumPy, Pandas

Web & Databases: HTML, CSS, MySQL, React.js, Node.js, MongoDB, Gemini API, REST APIs

Tools & Technologies: GitHub, Git, AWS, Tableau, Eclipse

Certifications: Future of AI (BlueDot Impact), Data Analytics (Deloitte), AWS Certified Cloud Web Practitioner

Education

IILM University, Greater Noida, UP

2023 – 2027

B.Tech in Computer Science and Engineering

CGPA: 7.54

Achievements

- President** at Entrepreneurship Cell – Won student elections at IILM University and was elected as President of the E-Cell.
- 1st Position at Ideathon – Secured 1st position for presenting **innovative** eco-friendly alternatives to plastic bags.
- Team Leader at Hackathon – Managed operations during the University Hackathon while **leading** a collaborative team environment.
- Volunteered at an NGO – Supported **fundraising** initiatives for children with no access to education.
